Professional certificates

- Introduction to Front-End Development by Meta – coursera
- HTML and CSS in depth by Meta – coursera
- Introduction to Front-End Development by Meta – coursera
- HTML and CSS in depth by Meta – coursera
- Version Control by Meta – coursera
- Programming with JavaScript by Meta – coursera
- Basic React by Meta – coursera
- Advanced React by Meta – coursera

Technologies

- HTML5
- CSS3
- JavaScript
- Git and Github
- TypeScript

Languages

- Arabic
- English

Skills

- Communication
- Creativity
- Teamwork
- Time management
- Problem-solving
- Critical thinking
- Decision-making
- Adaptability

Libraries and frameworks

- React.js
- Redux Toolkit
- Tailwindcss
- Next.js
- Auth.js

Work Experience

Jan 2023

Frontend dev at Tenchologya Co

Khartoum, Sudan

- Craft innovative user-facing features, construct reusable code and libraries to propel future projects, guarantee the technical viability of UI/UX designs, enhance application performance for unparalleled speed and scalability, validate all user inputs prior to backend submission, foster collaboration among team members and stakeholders, engineer code and libraries for seamless reuse, serve as the conduit between UI/UX vision and functional essence of the application.

Moviefy – (Movies app)

Moviefy is a Next.js application designed to browse and discover popular and top-rated movies. With an intuitive user interface and seamless navigation, Moviefy offers a delightful experience for movie enthusiasts.

Technologies Used:

- Next.js 14
- Tailwindcss
- TypeScript

Features:

- Popular Movies: Explore the latest popular movies with just a click.
- Top Rated Movies: Discover the highest-rated movies according to user reviews.
- Search Functionality: Find movies by title, genre, or keyword quickly and easily.
- Bookmarks: add movies to bookmarks quickly and easily.
- Pagination: Navigate through a large collection of movies effortlessly with pagination support.
- Light/Dark mode.
